Relavent Skills:

Object Oriented Programming, Data Structures, Computer Networks

---

PROJECTS:

• **Secure data transfer with cryptography and image steganography with rail fence**

- It aims to improve the security of data transmission specially when sensitive data need to be transferred.
- It use technologies like python, sqlite3, html, css, javascript
- this project creatively combines cryptography and image steganography, offering dual layer protection.

• **CampusCore - College website**

- manages all colleges activities and student services on a single web-based system.
- Built using Java, JSP, Hibernate, and JDBC for reliable and efficient performance.
- Handles student records, academics, attendance, and administrative operations seamlessly.
- Provides secure access with a simple and easy-to-use interface for students and staff.

• Paper Publication **of Secure data transfer with cryptography and image steganography with rail fence**. With **IJARSCT** in march 2025

Full Stack Java Development Intern:

Cyber Success:

Currently Pursuing a certification-based internship in Full Stack Java Development. Covering Core java, Advanced java, JDBC, Servlets, JSP, Hibernate, Spring and Frontend Technologies.
